

STATE OF MARYLAND - Transportation, Attachment 3.1-D

- (C) Transportation services are divided into four (4) distinct programs.
- (1) The Ambulance Services program is an optional medical services program. It covers only the coinsurance and deductible payments on approved Medicare ambulance services to Medicare primary, Medicaid secondary beneficiaries.
 - (2) The Transportation Grants program is an administrative service program. This program awards grants to local jurisdiction agencies to administer transportation services to recipients. Grantees are responsible for screening requests for transportation by recipients, arranging transportation, expanding existing and developing new transportation resources and purchasing or providing transportation services where necessary. The standards for the award and administration of these grants are set forth in State regulation at COMAR 10.09.19.
 - (3) The Transportation Services under the Individuals with Disabilities Education Act (IDEA) program is an optional medical services program. The regulations which govern this program are set forth in COMAR 10.09.25. This program transports children, from birth through age twenty (20), to and from Medicaid services. To qualify, the child must have an Individualized Education Program (IEP) or Individualized Family Service Plan (IFSP), as appropriate. Furthermore, both the medical service and the transportation service must be included on the child's IEP or IFSP.
 - (4) The Emergency Service Transporters program is an optional medical services program administered through State regulations at COMAR 10.09.31. This program reimburses qualified providers of emergency "911" transportation for services to Maryland Medicaid recipients.
